

PS CERTIFIED REFERENCE MATERIAL

POLYSTYRENE

12 samples × 250 mg each
Price: 1,500 USD

Our POLYSTYRENE standards kit includes 12 samples with molecular weight ranging from **800 Da to 6,000,000 Da** and narrow polydispersity. All our PS samples conform to international quality standards and are good for calibration and evaluation of analytical instruments, as well as for fundamental research.

Other Certified Reference Materials (polyethylene oxide, polymethacrylates, polypyridines, and polydienes) will be available in 2021! Please, check our website www.polymersource.ca for updates.

Thank you for choosing Polymer Source to supply polymers for your research.

It is our pleasure to continue serving you.

Sunil K. Varshney, Ph.D.
President and Company founder.
