

Sample Name: Oligo (vinyl alcohol), α,ω -bis(methyl)-terminated

Sample #: P60108-VA

Structure:

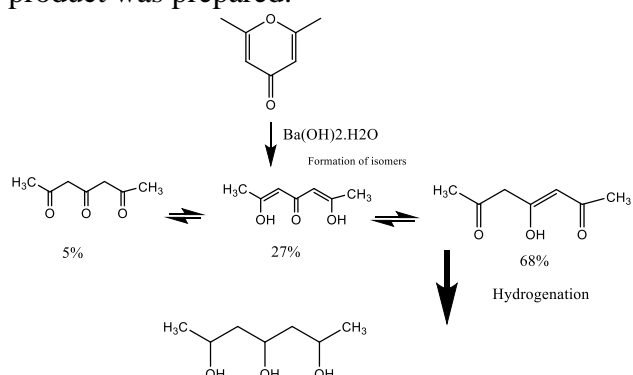

Composition:

Mn x 10 ³ (total)	PDI
0.148	1.01

Synthesis:

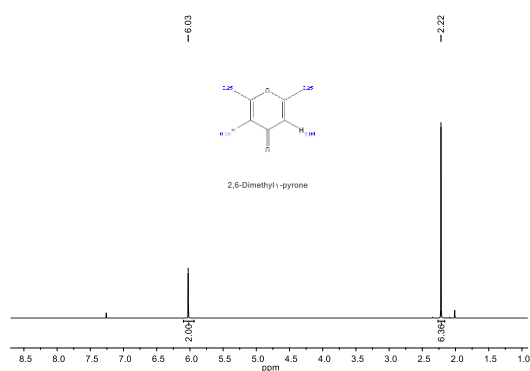

The following reaction scheme shows how the product was prepared:

Characterization:

The product was characterized by HNMR and FTIR.

HNMR of the product at different stages:

After Hydrolysis :
