

## Sample Name: Poly (t-butyl acrylate)

## Sample #: P43762-tBuA

### **Structure:**

### **Composition:**

| Mn x 10 <sup>3</sup> | PDI  |
|----------------------|------|
| 98.0                 | 1.05 |

### **Synthesis Procedure:**

Poly(t-butyl acrylate) is obtained by anionic polymerization process.

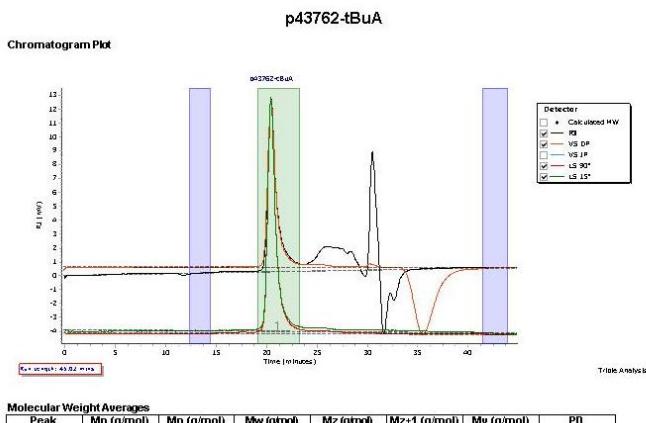

### **Characterization:**

The molecular weight and polydispersity index (PDI) are obtained by size exclusion chromatography (SEC) in THF. SEC analysis was performed on a Varian liquid chromatograph equipped with refractive and UV light scattering detectors. Three SEC columns from Supelco (G6000-4000-2000 HXL) were used with triple detectors from Viscotek Co.

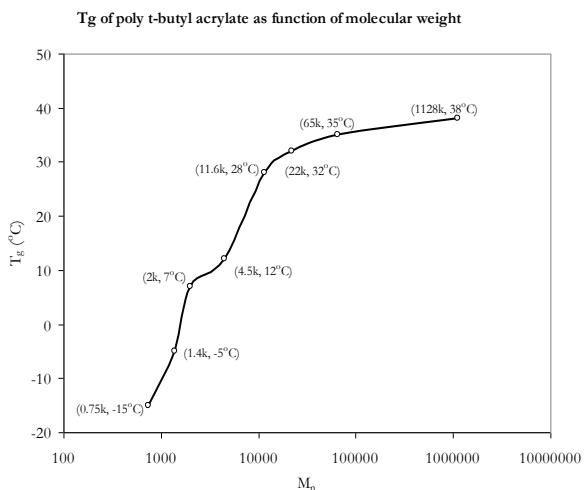

### **Solubility:**

Poly(t-butyl acrylate) is soluble in THF, DMF and CHCl<sub>3</sub>.

### **SEC elugram of Sample:**

### **DSC Thermogram of tBuA:**
