

Sample Name: **Poly(4-vinyl benzyl chloride)**

Sample #: **P14493-VBC**

Structure:

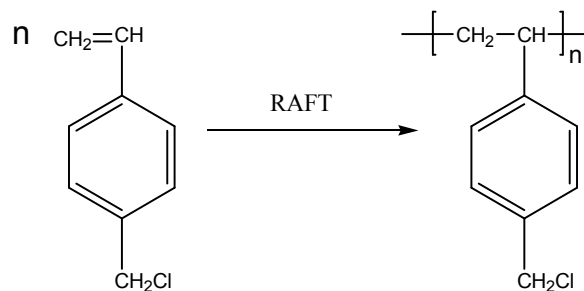

Composition:

Mn x 10 ³	PDI
8.0	2.3

Synthesis Procedure:

Poly(vinyl benzyl chloride) is obtained by RAFT polymerization of 4-vinyl benzyl chloride or a mixture of 3- and 4-vinyl benzyl chloride. The reaction scheme is shown below.

Characterization:

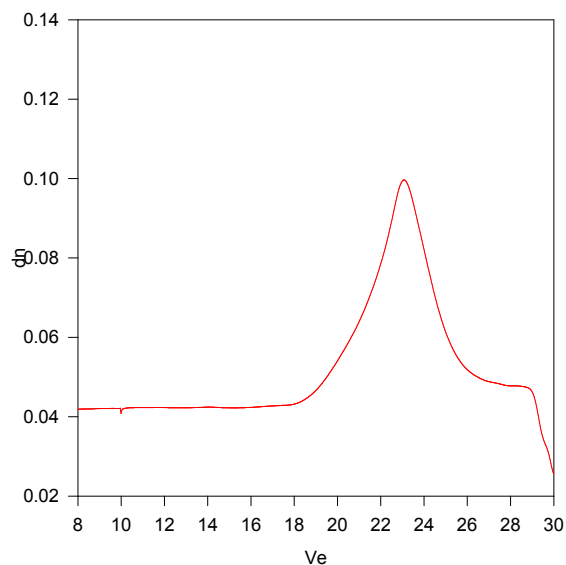

The molecular weight and polydispersity index (PDI) of Poly(vinyl benzyl chloride) are obtained by size exclusion chromatography.

Solubility:

Polymer is soluble in DMF, THF, toluene and CHCl₃. It precipitates from methanol, ethanol, water and hexanes.

SEC of Homopolymer:

P14493-PVBC

Size Exclusion Chromatography of Poly(vinyl benzyl chloride)
