

Sample Name: Oligomers of Poly(t-butyl acrylate)

Sample #: P10413C-tBuA (trimer)

**Structure:**

**Composition:**

Degree of Polymerization	PDI
D <sub>p</sub> by HNMR: 3	1.07
Mass : 442	

#### Synthesis Procedure:

Poly(t-butyl acrylate) is obtained by living anionic polymerization of t-butyl acrylate.<sup>1-4</sup>

#### Characterization:

The molecular weight and polydispersity index (PDI) are obtained by size exclusion chromatography (SEC) in THF. SEC analysis was performed on a Varian liquid chromatograph equipped with refractive and UV light scattering detectors. Three SEC columns from Supelco (G6000-4000-2000 HXL) were used with triple detectors from Viscotek Co.

Thermal analysis of the samples was carried out using a differential scanning calorimeter (TA Q100) at a heating rate of 10°C/min. The inflection glass transition temperature (*T<sub>g</sub>*) of the sample has been considered.

#### Solubility:

Poly(t-butyl acrylate) is soluble in THF, hexanes (low MW), toluene and CHCl<sub>3</sub>. This polymer precipitates from ethanol and methanol containing 10-15% water.

#### HNMR of the Polymer

SEC of Sample:

**P10409B-tBuA trimer**

D<sub>p</sub> of tBuA monomer is : 3 Mw/Mn 1.07

**T<sub>g</sub> of poly t-butyl acrylate as function of molecular weight**
